Powerflex

Powerflex

Powerflex is our original LED strip, and the product that changed the way we use lighting in the construction industry today.

Designed and developed in Norway for the weathered areas and cold winter conditions. We focus on high quality products that makes your job easier.

THIS IS POWERFLEX

- 25m of our most powerful LED strip light connected directly to 230V
- Ultra bright, evenly distributed light with no dark spots
- Rough and robust built enclosure made for tough conditions
- Quick and easy install. Plug & Play
- One product can replace loads of other types of lighting equipment
- Easy to handle, safe to use
- You will never have to change the light bulb

EXPERIENCE AND DEVELOPMENT

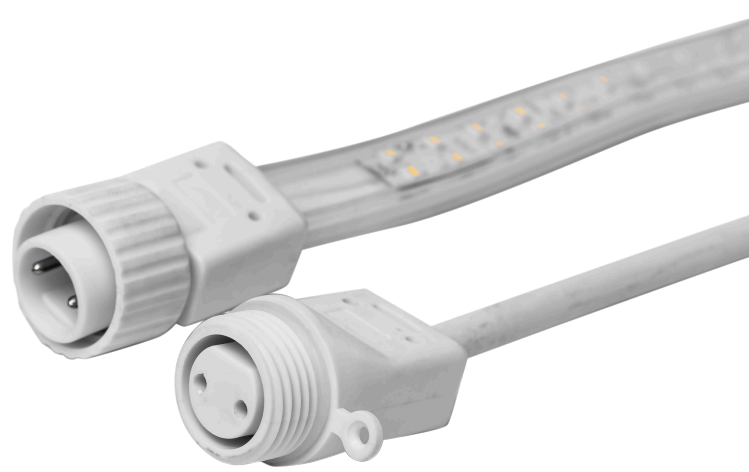

Promitto Group is a leader in the Nordic region and develops LED lighting for the construction industry.

We have been working with lighting for many years. We have learned that technology is constantly changing and that development is happening fast. That is why we are constantly developing our products and services.

The Nordic environment requires the best product quality to withstand both cold and harsh conditions, and Powerflex will make the work easier and safer for those who use it – therefore we focus on the details.

USER FRIENDLY

Why bother with the old fashion light bulbs and light fixtures? Powerflex strip is easy to handle, requires no maintenance and is quickly mounted.

EVEN, BRIGHT LIGHT

Each roll consists of 4,500 high-performance LED's distributed evenly over the entire length. This makes an even, bright light along the entire LED strip.

WITH FOCUS ON HIGH QUALITY AND YOUR SECURITY

Designed and developed in Norway for the weathered areas and cold winter conditions. We focus on high quality products that makes your job easier.

The strip is divided into independent segments of 1 meter which means that if a segment should break, the rest of the strip will continue to be illuminated so that the work can continue.

SAVE STORAGE SPACE AND SHIPPING COSTS

A typical lighting fixture are placed every 5 meter to light up lager areas.

They are about the same size as one roll of our LED strip. In this case you would need 5 lighting fixtures to light up the same area as our 25m LED strip.

For any project, this will save costs for both shipping, handling and storage.

Product	Article	Lumen (lm)	Watt	Kelvin	IP	LED qty	Voltage
Powerflex	150228	1500	350W - 14W/m	3000	65	180/m	220-240V

Article	Accessories
150228	Powerflex Connection cable for LED strip (spare)
