SafeLight

 Promitto

SafeLight

SafeLight is made with the newest LED technology on the market. This means that you get both increased safety and the possibility to interconnect LED strips up to 150 meters from one single outlet.

With SafeLight we can now offer the best and safest solution on the market.

THIS IS SAFELIGHT

- Our most powerful LED strip with 1500lm/m
- Inter-connectable up to 150 meters
- Integrated self-illuminating safety effect
- Rough and robust built enclosure made for tough conditions
- Quick and easy install.
- Plug & Play
- One product can replace loads of other types of lighting equipment
- Easy to handle, safe to use

EXPERIENCE AND DEVELOPMENT

Promitto Group is a leader in the Nordic region and develops LED lighting for the construction industry.

We have been working with lighting for many years. We have learned that technology is constantly changing and that development is happening fast. That is why we are constantly developing our products and services.

The Nordic environment requires the best product quality to withstand both cold and harsh conditions, and SafeLight will make the work easier and safer for those who use it - therefore we focus on the details.

USER-FRIENDLY

The Eledge lighting SafeLight strip is easy to handle, requires no maintenance and is quickly mounted. SafeLight has the power to light up entire buildings and replace several old types of lighting.

SELF-ILLUMINATING

SafeLight features a unique, built-in system for emergencies. The self-illuminating material helps create guidelines to show you the nearest exit if the power is cut.

CONNECTABLE UP TO 150 METERS

With SafeLight, we have made it possible to connect up to 150 meters of lighting from a single outlet.

2 x 25 METERS LED ON AN ECO-FRIENDLY CARDBOARD REEL

We've listened to our customers and we took the concept further by launching SafeLight on an eco-friendly cardboard reel. We've named this SafeLight ECO. The 25M SafeLight ECO is identical to our regular SafeLight, with the following exceptions:

- SafeLight ECO comes in a 2-pack.
- SafeLight ECO is on an eco-friendly cardboard reel.

ADD OUR EMERGENCY POWER SUPPLY

As an accessory you can add our LED Strip Light Emergency Power Supply to provide emergency lighting in the event of a power outage.

SAVE STORAGE SPACE AND SHIPPING COSTS

A typical lighting fixture are placed every 5 meter to light up larger areas.

They are about the same size as one roll of our LED strip. For any project, this will save costs for both shipping, handling and storage.

Product	Article	Lumen (lm)	Watt	Kelvin	IP	Voltage
SafeLight 3000K	155130	1500	300W - 12W/m	3000	65	220-240V
SafeLight 4000K	155140	1500	300W - 12W/m	4000	65	220-240V
SafeLight ECO	155141	1500	300W - 12W/m	4000	65	220-240V

Article	Accessories
151230	SafeLight Connection cable for LED strip (spare)
150375	SafeLight T-Split joint
150500	LED Strip Light Emergency Power
